With 360° base articulation and non-marring pads, this little wonder can make a big difference. Think outside the conventional shot and attach Frio Grasp Mini to anything round or flat, including table edges, stair railings, poles—pretty much anything short of the neighbor's cat. Even better, Frio Grasp's adjustable stabilizer claw creates a third contact point for secure mounting. It's perfect for tight greenroom portraits, or even attaching to a nightstand during a newborn baby shoot. Your imagination is your only limitation. Plus, with Frio Grasp Mini, you get Frio Hold—the Best. Cold shoe. Ever.
